Introduction

We are working on the Castlemaine Heritage Study to make sure places with heritage significance are protected.

Stage 1 Heritage Gap Analysis:

We are currently in the first stage of the study which focuses on a gap analysis.

A heritage gap analysis identifies places of heritage significance that are currently not protected for their significance (i.e. are not within a heritage overlay but should be). This process is informed by desktop review, field work, and consultation with the community and key stakeholders.

The hunt for heritage:

Across November and December in 2022, we invited stakeholders and the broader community to join in a 'Hunt for Heritage'. The purpose of this consultation was to seek suggestions from the public regarding potential heritage places, which are currently not protected for their heritage significance.
